

Green Millennium Photocatalyst Treatment

Light Purification Revolution

Do you know...

- Indoor Air is up to 100 times worse than outdoor air (American College of Allergists)
- 50% of all illness is caused by indoor air pollution (Environmental Protection Agency)
- Indoor Air Pollution is wide spread. You are more likely to get sick from pollution in your home and office than from pollution in the air outside. (The American Lung Association)

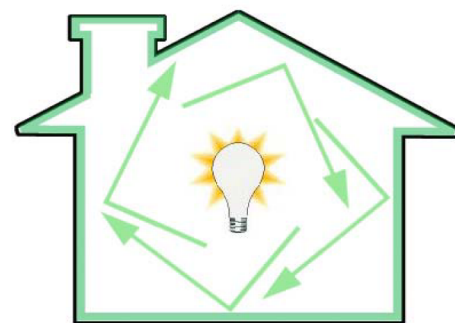

We spend 90 percent of our time indoors. People are developing chronic respiratory diseases such as asthma as they were exposed to indoor air pollutants. Indoor air pollutants such as formaldehyde in the furniture could also cause skin irritation, eye dryness and nausea.

Green Chemistry for Green Building...

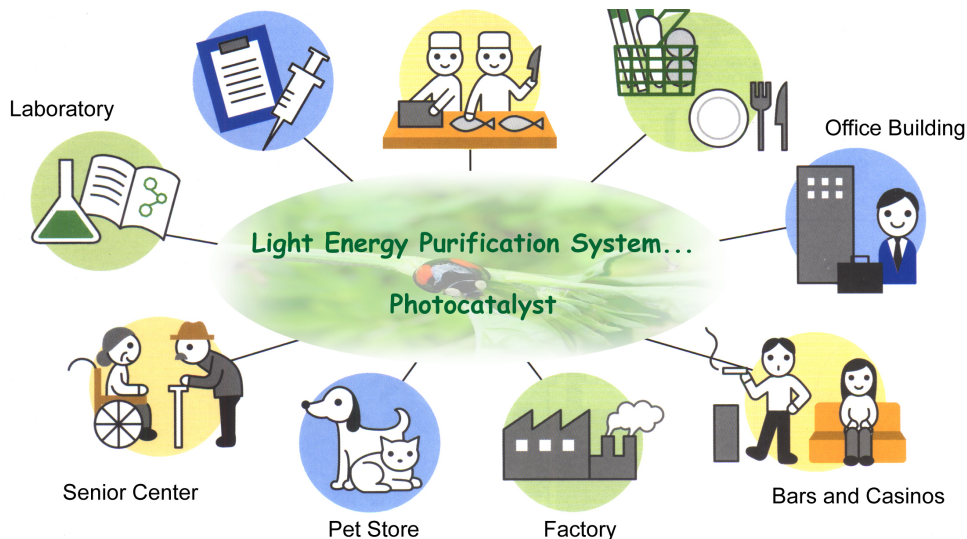

INDOOR AIR PURIFICATION, DEODORIZATION, PREVENT SICK BUILDING SYNDROME AND ALLERGY

Introducing Green Millennium photocatalyst intelligent coating, the next generation of 3-Dimensional air purification system

- Compare to **Photosynthesis** of plants, **Photocatalyst** harness light energy to breakdown toxic pollutants into harmless substance such as water and carbon dioxide.
- Uses readily available light energy. Photocatalyst starts purifying your environment whenever there is light.
- Reduces allergies and respiratory illness caused by mold spore, pollen, pet dander, or toxic chemical.
- Deodorizes any smell caused by tobacco smoke, pets, urine or feces.

THREE-DIMENSIONAL AIR
PURIFICATION MECHANISM

- NO OR LOW ENERGY CONSUMPTION
- LONG LASTING
- NO MAINTENANCE REQUIRED
- ENVIRONMENTAL FRIENDLY
- INTELLIGENT GREEN CHEMISTRY
